## PROJECTS

### InfoFeed — A User-Friendly News Submission and Journalist Review Platform

I developed the back-end of a news platform using Spring Boot, where users upload news content that is analyzed and published by journalists. The front-end was built with HTML and CSS, while I focused on creating APIs for user authentication, news uploads, and seamless integration of data processing and storage.

### Social Media Post

In the social media project, I developed APIs to handle creating, reading, updating, and deleting posts, ensured data validation, implemented error handling, designed the database schema, and managed data storage and retrieval efficiently.

### Library Management System

Developed a comprehensive Library Management System using Spring Boot and MySQL. This system allows users to borrow and return books efficiently, with features to track overdue books and calculate fines. Ensured smooth library operations and an enhanced user experience through robust back-end development and database management.

## EDUCATION

### Kongunadu College of Engineering, Trichy—B.E CSE

2021-2024

**CGPA : 7.8**

### Saravana Niketan, Erode —HSC

2021

**Grade: 82%**

### Saravana Niketan, Erode — *SSLC*

2019

**Grade:79%**

## LinkedIn

linkedin.com/in/mukesh-s-19668928b/

## PROGRAMMING SKILL

Java Programming

SpringBoot Framework

SQL

## COCURRICULAR ACTIVITIES

Attended several paper presentations like (
Blue Eyes Technology,
AR and VR,
Smart Dust )

Participated in multiple workshops

## ADDITIONAL

Udemy Certified Spring and SpringBoot Framework

Microsoft Certified in Python

I engage in coding pratice on HackerRank

## LANGUAGES

English,Tamil
